

CPSC 323 Compilers & Languages (Spring 2024)

PROJECT 2

**Deadline: May 8th, 2024**

Project 2 deals with the analysis and implementation of a Parser (Syntax Analyzer). This project must be submitted/uploaded online on Canvas.

You are allowed to write your project code in C/C++/Java/Python etc. but you ARE NOT allowed to use Yacc, Bison, or any other items similar that assist in the creation of compilers.

- Given the following CFG and the LR parsing table, write a program to trace input strings over { id, +, \*, ), ( } and ending with \$.
- Test it on three input strings (1) (id+id)\*id\$ (2) id\*id\$ (3) (id\*)\$
- Show the content of the stack implementation for each case. Output must be displayed along the stack implementation.

Output (Example):

Input: (id+id)\$

Stack:

| Step | Stack | Input | Action |
|------|-------|-------|--------|
| ...  | ...   | ...   | ...    |
| ...  | ...   | ...   | ...    |

Output: String is accepted/ String is not accepted.

- Draw the Parse Tree for each case. Save this information in a document named "tree\_mydesign".

| CFG                   | FIRST                                  | FOLLOW                                 |
|-----------------------|--|--|
| $E \rightarrow E + T$ | $\text{FIRST}(E) = \{ (, \text{id} \}$ | $\text{FOLLOW}(E) = \{ +, ), \$ \}$    |
| $E \rightarrow T$     | $\text{FIRST}(T) = \{ (, \text{id} \}$ | $\text{FOLLOW}(T) = \{ +, *, ), \$ \}$ |
| $T \rightarrow T * F$ | $\text{FIRST}(F) = \{ (, \text{id} \}$ | $\text{FOLLOW}(F) = \{ +, *, ), \$ \}$ |
| $T \rightarrow F$     |  |  |

|         |  |  |
|---------|--|--|
| F → (E) |  |  |
| F → id  |  |  |

LR Parsing Table

| State | id | +  | *  | (  | )   | \$  | E | T | F  |
|-------|----|----|----|----|-----|-----|---|---|----|
| 0     | S5 |    |    | S4 |     |     | 1 | 2 | 3  |
| 1     |    | S6 |    |    |     | acc |   |   |    |
| 2     |    | R2 | S7 |    | R2  | R2  |   |   |    |
| 3     |    | R4 | R4 |    | R4  | R4  |   |   |    |
| 4     | S5 |    |    | S4 |     |     | 8 | 2 | 3  |
| 5     |    | R6 | R6 |    | R6  | R6  |   |   |    |
| 6     | S5 |    |    | S4 |     |     |   | 9 | 3  |
| 7     | S5 |    |    | S4 |     |     |   |   | 10 |
| 8     |    | S6 |    |    | S11 |     |   |   |    |
| 9     |    | R1 | S7 |    | R1  | R1  |   |   |    |
| 10    |    | R3 | R3 |    | R3  | R3  |   |   |    |
| 11    |    | R5 | R5 |    | R5  | R5  |   |   |    |

- You must write a report file to briefly specify documentation & how to setup/run your program if needed. Document the code, processes, roles, and results in this file.
- C/C++/Java/Pythonogram, which is supposed to be developed in C/C++/Java/Python, should represent the implementation of your idea.
- Your submission must have Three (3) files: your design file, your program file, and a documentation file. The Design file and Documentation file should be submitted in PDF format. Upload it in canvas (either the zip file or GitHub link).
- Remember, the journey is as important as the destination. All the best!
